

Vole & Mole Free 1250

Model:25130

Description:

The sound technology behind the advanced Silverline A-Frequency™ generates powerful PowerVib™ vibrations in the ground, which disrupt the animals' natural behavior and drive them away from the area. The sturdy aluminum tube is easy to push into the ground and immediately generates the discomforting vibrations that unsettle the animals. In compact clay soil, it covers an area of up to 1250m² and is powered by batteries. A Silverline Pest Control garden System product. Coverage area 1250m² (compacted clay) Battery powered 4x1,5V LR20 CE-labelled.
