

Somfy Smoke Detector

Model:2400443

Description:

- Standard mode: The device operates autonomously, as a conventional smoke detector. It detects the opacity of the ambient air and sends a signal 85 dB in case of alarm in order to prevent the occupants.
- Connected to a Somfy alarm: In addition to the "standard" mode, the alert is sent to the plant and it triggers the siren of the house. If you are also equipped engine RTS shutters thereof are opened to facilitate the evacuation of the housing.
- You have a box (or box Somfy TaHoma) after installing a "detector" module, you can provide a complete scenario of evacuation of the residence: Opening shutters, skylight, the portal + lighting lights...

Earnings:
