

Multi-Function Sterilizer with USB Charger and Aromatherapy Diffuser

Description:

The average cell phone carries more germs per square inch 18 times than a toilet seat" While you wash our hands, you never wash your phone. On average, a cell phone is 18x dirtier than a public restroom. In fact, 1 in 6 cell phones have fecal matter on them. Germs and bacteria can grow and thrive on our phones because they are always warm and they are stored in dark places.

Cellphone Sterilizer

Protect your health by sterilizer, fragrance and phone charger

How dirty your cell phone?

Germ on Cell Phone ●●

On average, a cell phone is 18x times dirtier than a public restroom. All the germs you touch you transfer to our phone. Germs and bacteria can grow and thrive on our phones because they are always warm, and then will affect your health including skin health.

Germs goes to your face when you call your friends, some germs will affect the skin health. Germs goes to your baby's face when you kiss him/her, it risks for health.
