

Bluetooth Bicycle Speed Cadence Distance

Description:

This Bike Speed & Cadence Sensor consists of a separate Cadence Sensor wired to a Speed + Distance Sensor that has a battery hatch and a Bluetooth 4.0 transmitter.

The sensor includes two magnets to activate the sensors and cable ties for installation.

Being a bike speed and cadence sensor, it will detect and send your real-time RPM, speed, distance and other information to you accurately.

Based on high quality material, the sensors and magnets can be attached to your skin closely.

This Bluetooth 4.0 technology supported device is very fashion and creative.

The most popular bicycle sensor in the world easy to use yet is very durable.

Ultra low power consumption, the replaceable battery's life will last up to 1 year.

In addition, this device is also recommended to work with the following APPs: WahooFitness, Strava, MapMyRide and Runtastic.
