

Intel W5 Mini PC Computer Stick

Description:

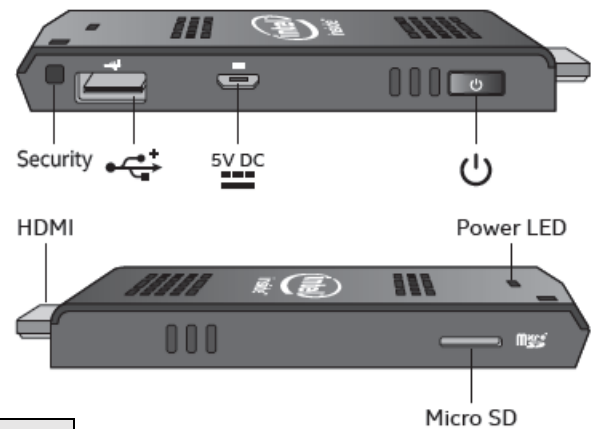

The Intel Compute Stick is a desktop computer that's so small; it doesn't have to sit on your desk at all. Just plug the HDMI connector into a TV or monitor, connect a power source, and you can basically turn any display into a fully functional PC.

Features:

- CPU: Intel Bay Trail-T CR up to 1.83GHz Atom Z3735F
- GPU: Intel HD Graphic(Gen7)
- OS: Windows 10 Android 4.4 dual OS
- 2GB RAM 32GB ROM 64Bit
- Support 2.4GHZ and 5GHz Dual WiFi, Bluetooth 4.0
- Multilingual support

Specifications:

General	
Model	W5
Color	Black
Material	Plastic
System	
Operating System	Windows10; Android4.4
CPU	Atom Z3735F, 64bit
GPU	Intel HD Graphic (Gen7)
RAM	DDR3 2GB
ROM	EMMC 32GB
Extended Storage	Up to 128GB
Communication	
Wifi Connectivity	RTL8723BS/AP6330,IEEE 802.11 b/g/n
Bluetooth	4.0
Camera	N/A

Media	
Video Supported	HD MPEG1/2/4, H.264, H.265, HD AVC/VC-1, RM/RMVB, Xvid/DivX3/4/5/6, RealVideo8/9/10
Audio Supported	MP3, WMA, AAC ,WAV, OGG, AC3, DDP, TrueHD, DTS, DTS, HD, FLACAP
Picture Supported	JPEG, BMP, GIF ,PNG, TIFF, etc.
Interfaces	
HDMI Port	Standard HDMI male
Other Interfaces	2xUSB;1xTF Card slot;1xMicro USB
Other Features	
3G	N/A
Other Function	Support DX 11,Open GL 3.0,OpenCL 1.2,OpenGLES 2.0
Power	5V/2A

Applications:

The Intel Compute Stick can do just about anything a larger PC can. You can use it to watch movies, play (some) games, edit documents, or perform many other tasks.

But it's a low-power computer that doesn't have the graphics chops for bleeding edge gaming and doesn't have enough ports for some common activities.

Intel is positioning the Compute Stick as a device for consumers or businesses. You can plug it into any television to transform it into a smart TV for streaming internet music or video, playing games, web surfing, and more. Hook up a USB webcam and you can use it to Skype from your TV.
