

SONY

SONY XB650BT Extra Bass Bluetooth Headphones

Key Features

Feel the power of EXTRA BASS

Tailor-made for dance music, innovative EXTRA BASS technology delivers deep, punchy bass.

Bass with added depth

Part of the EXTRA BASS product range, these headphones incorporate Bass Booster technology. This provides an acoustically-tight seal for superior sound isolation and tight bass response.

Play anywhere, for longer

A longer battery life gives you extended listening with 30 hours⁴ of superior sound. And you can enjoy the freedom of wireless connectivity with Bluetooth® and NFC One-touch listening.

Listen in comfort

Compact and lightweight, the XB650BT headphones' design not only delivers long-listen comfort but also helps optimize bass.

Fit for bass

The adjustable headband's structure is optimized for deep bass playback, providing a stable fit to minimize vibration caused by punchy bass notes.

Form meets function

Soft cushion ear pads provide a largely airtight seal for direct bass transmission. When not in use the ear cups swivel flat for easy packing.

Come alive with every beat

Just sit and put on the incredible XB650BT to experience the world of music come alive. Every beat makes you feel the power of EXTRA BASS

NFC One-touch for instant connectivity

Near Field Communication (NFC) and Bluetooth® technology remove the need for wired connections and complex set-up sequences. Simply touch your NFC-enabled device to the headphones for a quick, seamless connection, then start streaming your music collection. No NFC? No problem. Connect via Bluetooth® and you're ready to go.

EXTRA BASS™ 2 for deep, punchy sound

As part of the EXTRA BASS product range from Sony, these headphones are ideal for listening to EDM and other bass-heavy music genres. They feature Bass Booster technology that provides an acoustically-tight seal for superior sound isolation, deep bass sound and tight bass response.

Swivel design for easy packing

The headphones' swivelling ear cup design enables easy storage when you're not using them, and enhances portability when you're travelling. The ear cups swivel flat, so you can pack them into a suitcase or a bag without worrying about them taking up too much valuable space.

Cushioned ear pads for total comfort

Listen in total comfort. These headphones have a self-adjusting headband and soft cushioned ear cups that cover the whole ear. Enjoy the long-lasting comfort you need for listening to your favourite albums back-to-back.

Long battery life for non-stop listening

A charge of around 4 hours will enable you to enjoy approximately 30 hours³ play time. So you can keep on listening, track after track, mix after mix.
