

ARGOX OS214 Ribbon 110mmx90m

Description:

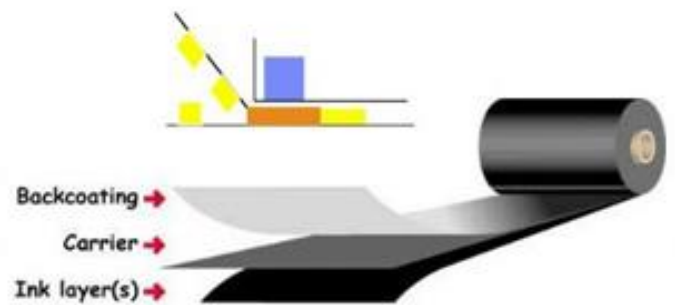

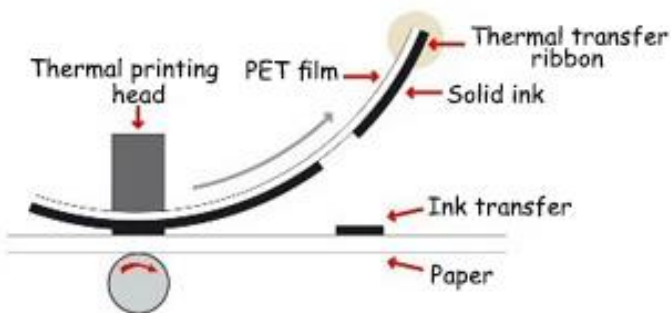

The Argox ribbon is intended for the printing of variable data and bar codes provided by the customer. It is supplied for several models of the Argox brand, mainly serving the OS 214, OS 214 plus models.

Features:

- Reinforced wax base, with good adaptability and versatility.
- Uniform coating, cannot afford to lose carbon.
- Anti-static back coat to effectively protect the print head.
- Excellent printing results, cost-effective.

Specifications:

- Axis: 25mm
- Width: 110mm
- Length: 90m

How it works:

- Keep the ink on the surface by heating
- The ink on the film is transferred from solid to liquid and transferred to the surface under heat

Heat transfer tape is a layer of PET on the film coated with soluble ink on one side, coated with a protective layer called back coat.
