WorldPenScan X (iOS/Android/Mac/Win) Intelligent Handheld Pen Scanner And Translator

Product Overview:

Scan On the Go, Translate Immediately

WorldPenScan X brings in Bluetooth 4.0-BLE technology to facilitate the data transmission to any mobile devices wirelessly. You can scan printed material and capture words or sentences into Mac, iPad, iPhone and Android mobile devices. Let you scan and edit documents on the go, translate and share information immediately.

Software Features:

Bluetooth wireless connection instantly ready when powered on

- Adopt the Bluetooth 4.0-BLE technology to facilitate the data transmission to Mac, iPad, iPhone and Android mobile devices.
- The scanned result can be immediately digitized into texts and transmitted the scanned result to Win/Mac PCs via USB port.

Recognize multiple languages, barcodes and bank fonts

- Support English, Japanese, Korean, French, German, Italian, Spanish, Arabic, Vietnamese, Traditional Chinese, Simplified Chinese, and more.
- Recognize barcodes and bank fonts such as OCR-A, OCR-B, MICR on PCs.

Immediately translate and edit in multiple applications

- Scan and translate sentences without typing any word. It's easy to check vocabulary, pronunciation, and extended queries in the dictionaries.
- Directly edit scanned data in MS office applications, E-mail and browsers.
- Search the scanned data on Google, YouTube and Wikipedia with one click.
- Support importing offline dictionaries, such as StarDict and Lingoes format.

Take a partial screenshot for translation and further applications

- You can extract texts from screenshots and send the texts to Microsoft Word/ Excel/ Line/ Skype for further applications. Besides, WorldPenScan software allows you to translate the digitized texts into multiple languages.
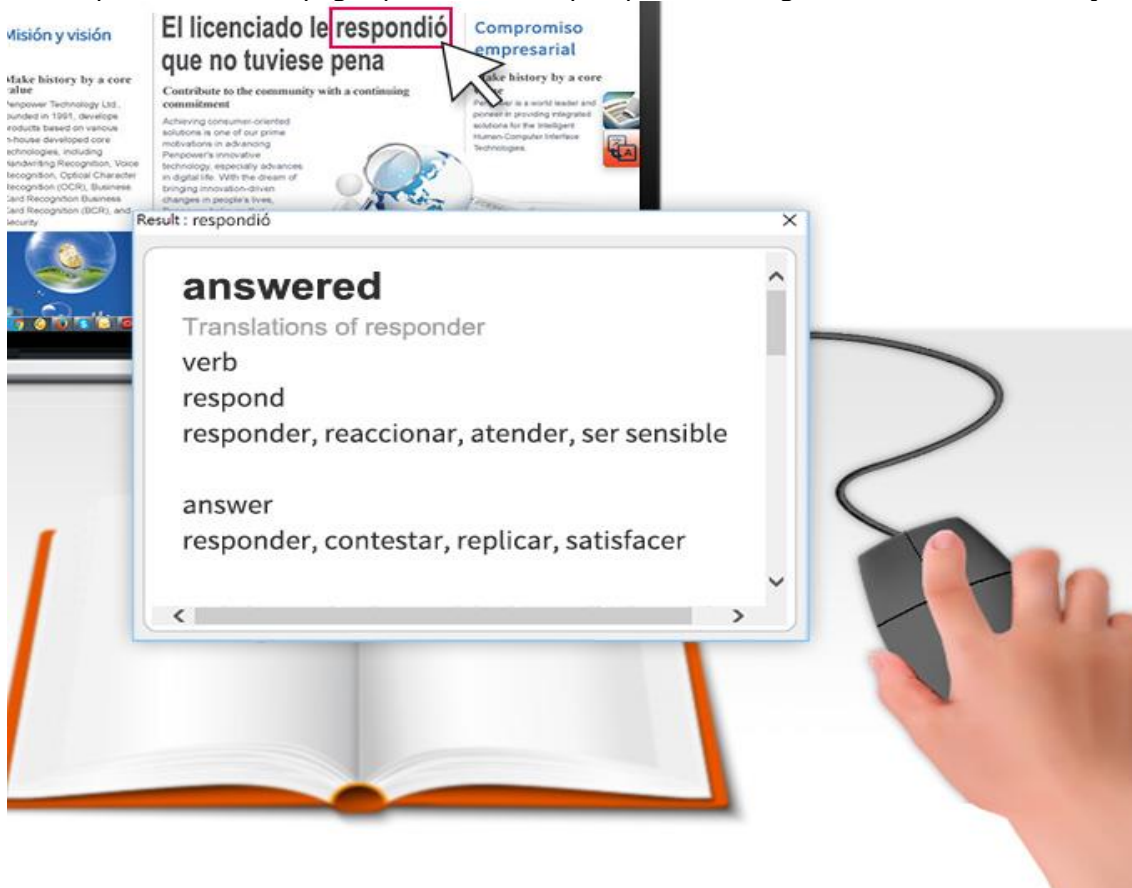

- It is quite convenient to capture a formula, form and chart from web pages or PDF, and send the images to Microsoft Word / PowerPoint instantly. (Only for Windows)

• When you view a web page, you can look up any word and get its definition with just one click.
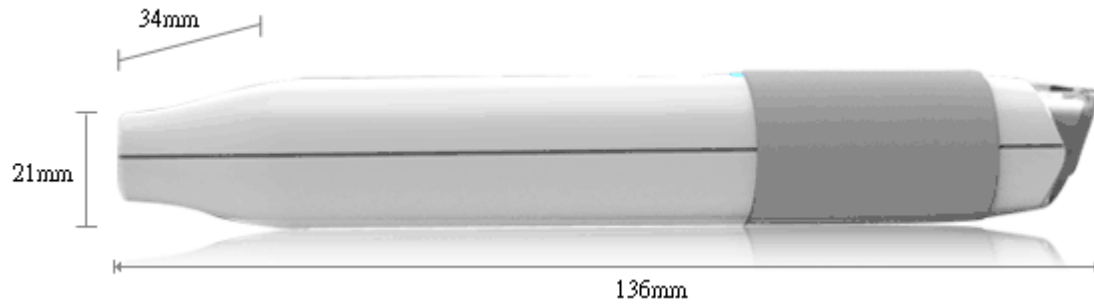

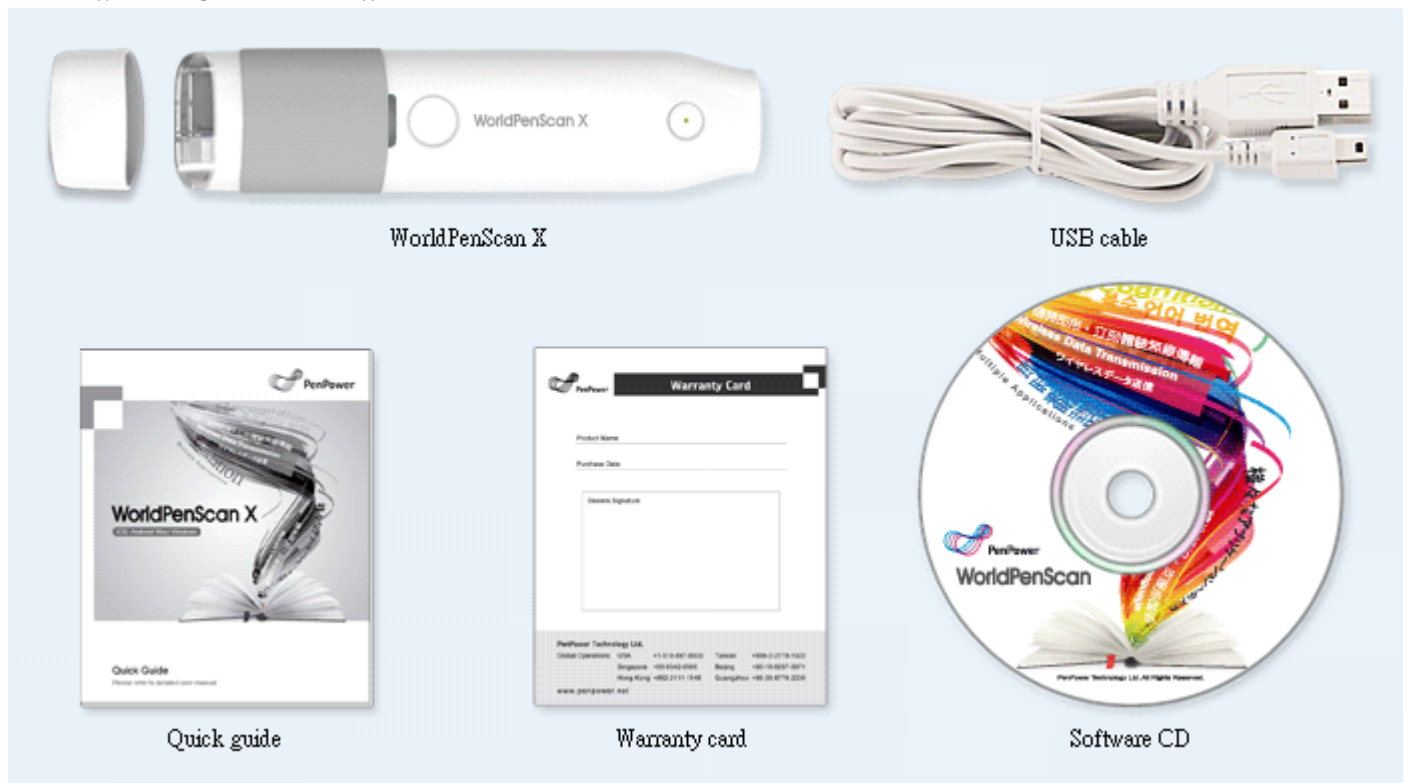

Get more details of a book by scanning the ISBN code

• You can easily find book details and reviews on Google Books by scanning the ISBN code (texts).
