

Digital Multifunctional Exposure Timer

Model:QH-3A

Description:

The QH-3A exposure timer is an electronic darkroom professional timing device with extremely high performance specifications. The timer has reasonable structure, beautiful appearance and convenient use, and can be used together with an amplifier or an exposure box. It can also be used for equipment that needs to be connected to a 220V AC power source at regular intervals.

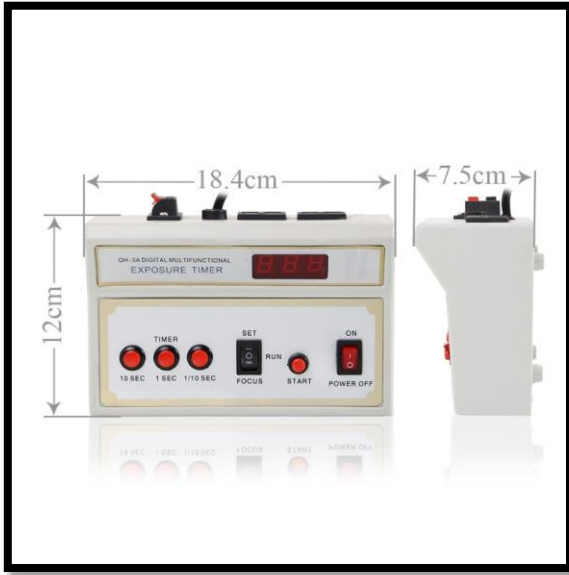

Features:

- The core device of the timing circuit adopts the internationally advanced computer chip, which has extremely high timing accuracy, reliable operation and stable performance.
- The LED digital tube directly displays the timing time (using the countdown method), which is more convenient and intuitive to use.
- The number of timed exposures is automatically recorded in the computer chip and can be viewed at any time.
- The message function, whenever the end of the time to send out a signal, remind you to deal with it in a timely manner.
- Timing range: 0.1-999 seconds, timing error: <0.05%

Specifications:

- Power Supply Voltage: 180-240V AC
- Load Capacity: 500W
- Ambient Temperature: 0-40 °C
- Relative Temperature: <85%
- No Corrosive Gases
