

Pneumatic Air Filter 1/2" ***Model: AF4000-04***

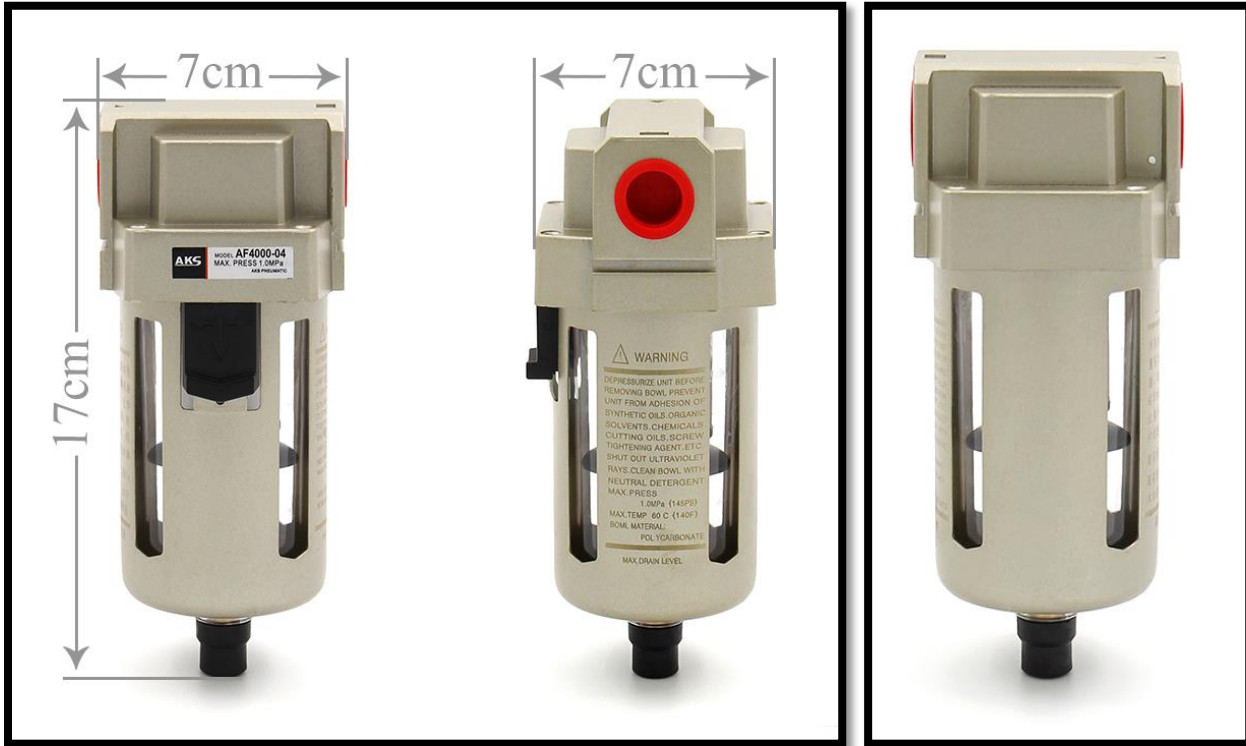

Features:

- Internal baffle spins air for water removal.
- Easy bowl removal and element replacement.
- Stable performance and durability.
- A cost effective, clean looking solution to your filtration needs.
- Easy installation, suitable for various installation environments.

Specifications:

Max. Working Pressure	1.0MPa/ 145PS
Max. Working Temperature	60 °C/ 140°F
Inlet and Outlet Port Size	1/2"
Filtering Accuracy	5µm
Rated Flow Rate	4000L/ Min
Recommended Oil	Turbine Oil Class I. ISI VG32
Material	Polycarbonate
Size	Approx. 17x7x7cm
