

Arduino Nano Sensor Shield Nano With Bluetooth XBEE

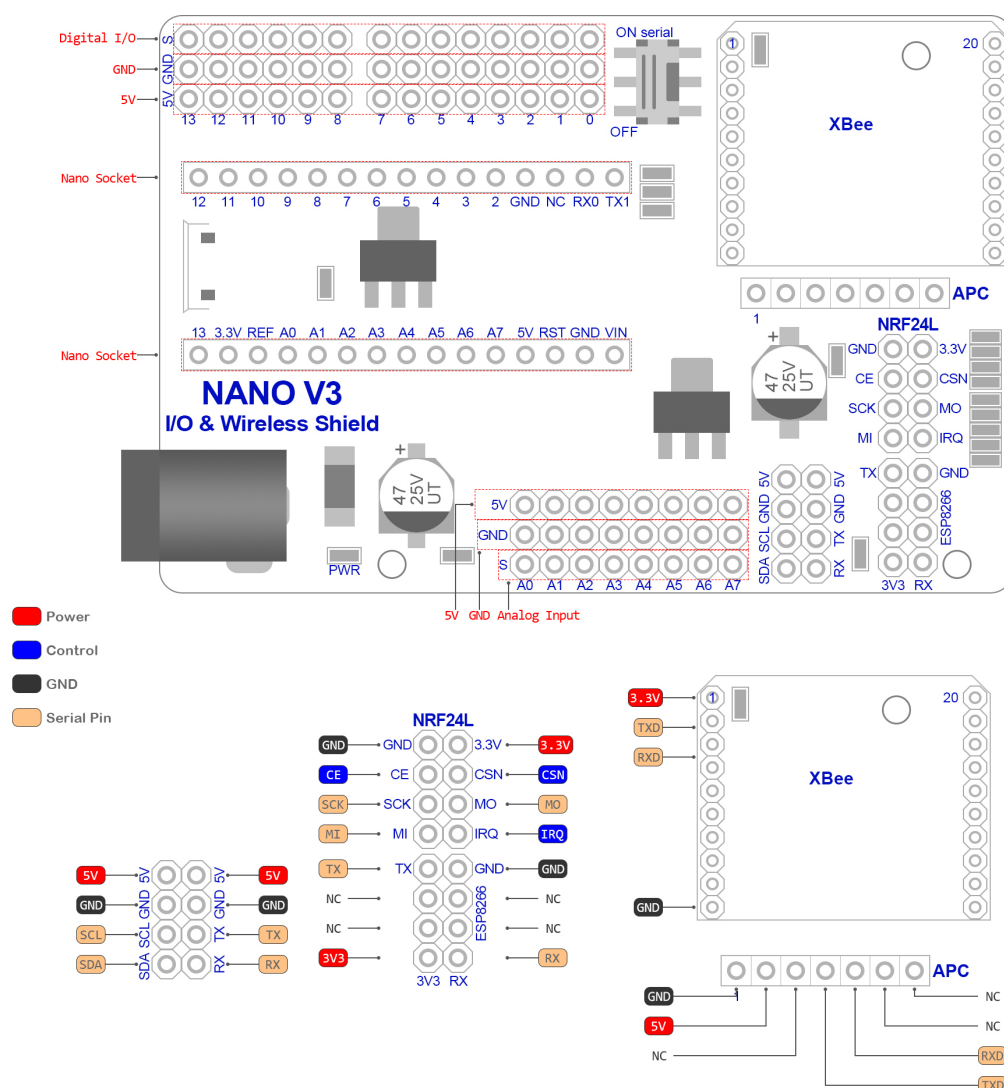

Model: Nano V3.0 I/O & Wireless Shield

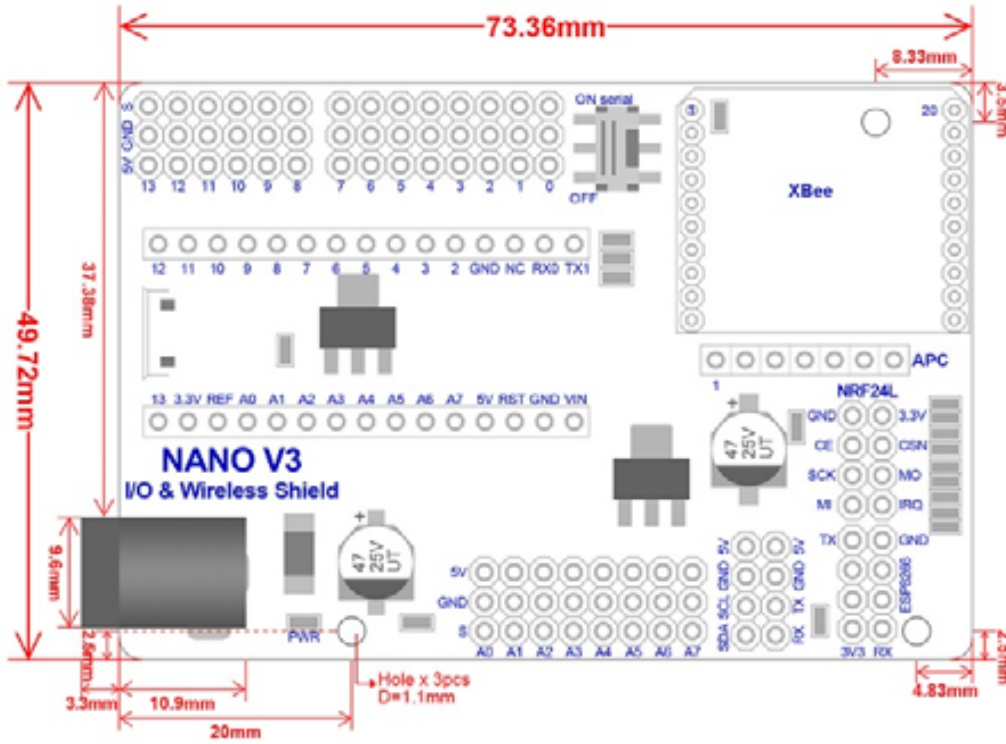

Description:

Arduino Nano IO Wireless Shield is specifically developed for easy connection between Arduino Nano and Wireless devices: xBee modules, nRF24L01 RF radio modules, ESP8266 Wi-Fi modules, APC220 wireless RF modules. Actually, it expands the Arduino Nano controller to link those devices in a simple free manner. It is a perfect additional of Nano controller and compatible with both Arduino Nano v3.x.
