

## Mobile Phone Flat Vibration Motor Module

### Features:

- High quality phone vibration motor, significant vibration effect
- Driver: MOS tube, high level triggered and low level cut-off
- Control the shockproofness of motor by PWM
- Suitable for the making of vibrational interactive products and wearable smart devices
- Application: for Arduino, singlechip, wearable smart devices and so on

### Specifications:

- Port: Digital quantity
- Voltage: 5V
- Size: 21x30mm
- Fixed hole: 3mm
- Pitch: 15mm
- Motor: 10mm diameter, 2.7mm thickness, flat motor
