- Outdoor Temperature Range:-40~60°C
- Temperature Accuracy: $\pm 1^{\circ}\text{C}$
- Water Level Measure Range: 0 ~15m
- Resolution: 0.01m
- Accurate: +/-0.03M
- Transmission Frequency: 433MHZ
- Transmission Range: 100 meters (300 feet)in open area
- Transmission Interval: 30s when level changes or 3 minutes when level does not change
- Battery power: receiver 2 x AA 1.5V (not included), outdoor transmitter: 6 x AAA 1.5V (not included)

Package Content:

- ✚ 1 x Indoor receiver
- ✚ 1 x Water tank transmitter
- ✚ Mounting screws
- ✚ Instruction manual

More Details:

Keep an eye on your outdoor water tank from the comfort of your own living room, up to 100m away. Installed at the top of your water tank, the transmitter unit measures the water level and temperature using an ultrasonic sensor. You can hang the receiver unit on a wall (hooks) or pull out the stand and place it on your kitchen bench top, table or desk. View your room's temperature, tank temperature and water level (represented by a 10 element bar graph). You can store min/max records and set alarms for specific water levels (high/low) or when empty.
