

Board Air-Conditioner Inverter Floor

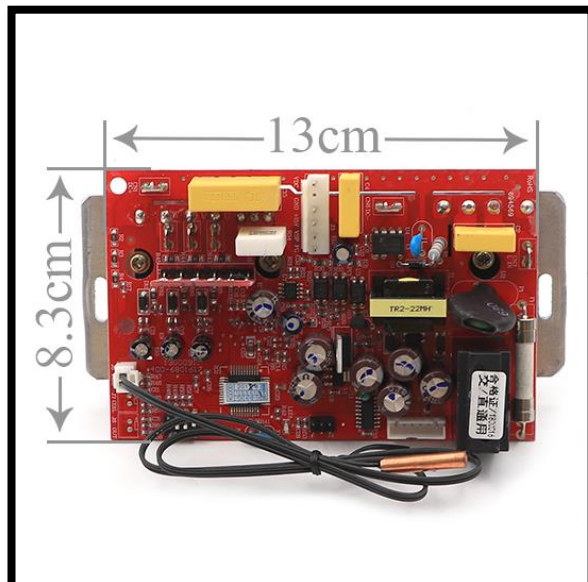

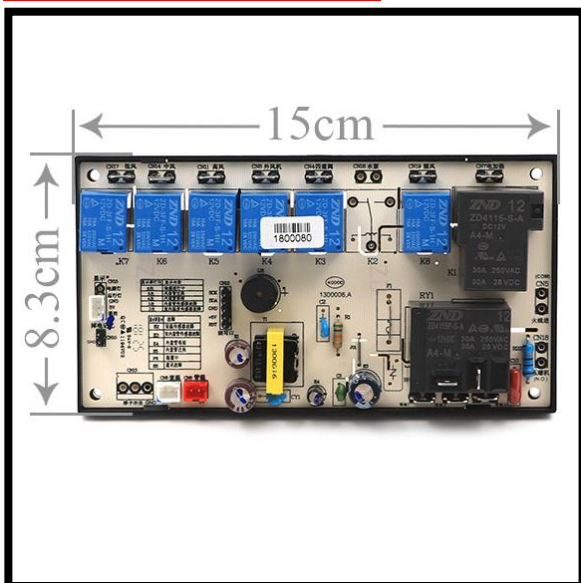

Model:1800016

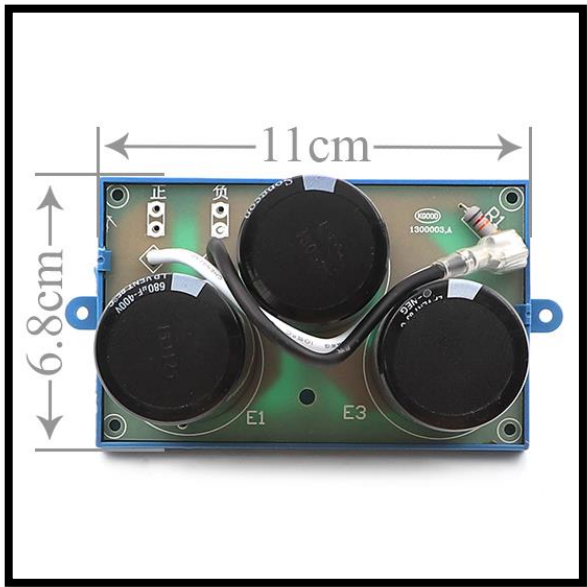

Features:

- Intelligent AC DC inverter control
- Electronic expansion valve control
- Switching power supply design
- Fault display
- Anti-cold wind protection
- Wide voltage range
- High temperature protection
- Intelligent defrost
- Anti-freeze protection
- Dual sensor
- Timing function
- Auxiliary electric heating
- Fan high, medium and low three-speed control, swing control
- External fan control
- Module protection indicator flashes
- The display automatically indicates when the defrost function starts
- When the temperature sensor is open or shorted, the display digital tube lights up.
- Large-screen LCD display is more intuitive and easy to operate
