- Projection area: 2.66m x 1.49m (Width x Height)
- Curtain material: Glass fiber white
- Curtain gain: 1.2
- Viewing angle: 180°

Dimensional Drawing:

Instructions:

Opening the screen:

Pull down the pull tab of the screen drop lever evenly. Stretch until the black edge is exposed or the red line is exposed. Do not apply force downwards.

Pause, as the curtain's resilience slowly sends up a section until the curtain is locked.

Folding the screen:

To retract the screen, follow the same as the above method. The curtain is pulled down by about 40mm, and it is sent upwards with the rebound force of the curtain. You can't let it go and take it back until the curtain is completely included in the screen box.
