

# 12-24V Lithium Battery Charge Control Module

**Model: XH-M603**

## Description:

The XH-M603 is a PCB control module used to charge lithium batteries, Lead-acid, nickel-cadmium, nickel-metal hydride, lithium-ion and polymer. You can assemble your own Lithium battery charger by using this charger module. The module can also be used for solar panels.

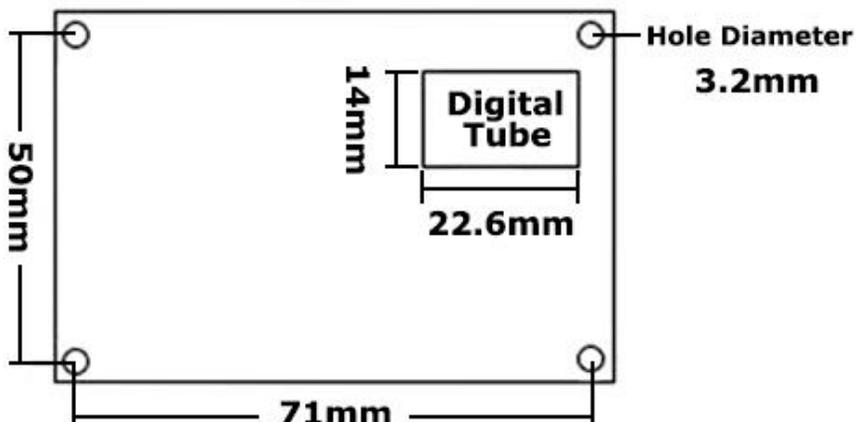

## Specifications:

- Input Voltage: DC 10-30V
- Display Precision: 0.1V
- Control Precision: 0.1V
- Output Type: Direct output
- Voltage Tolerance:  $\pm 0.1V$
- Size: 82x58x18mm

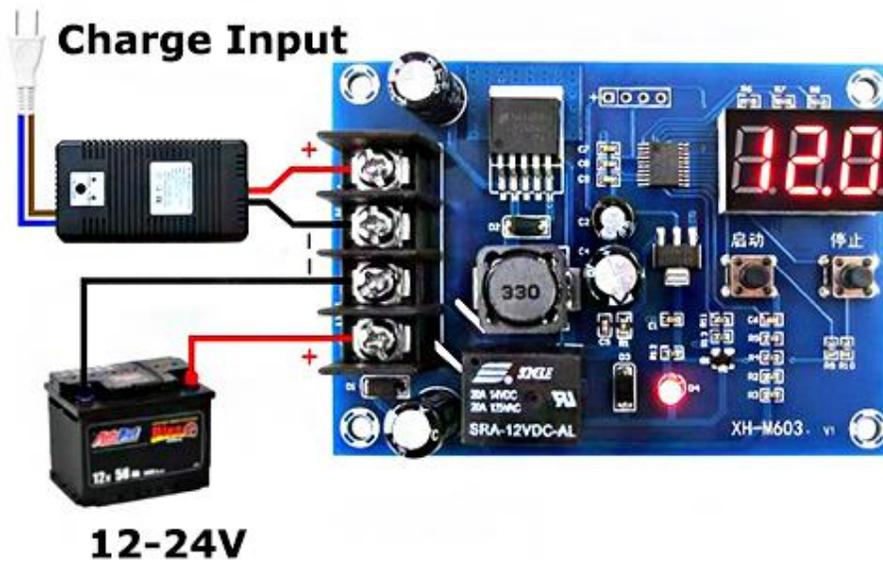

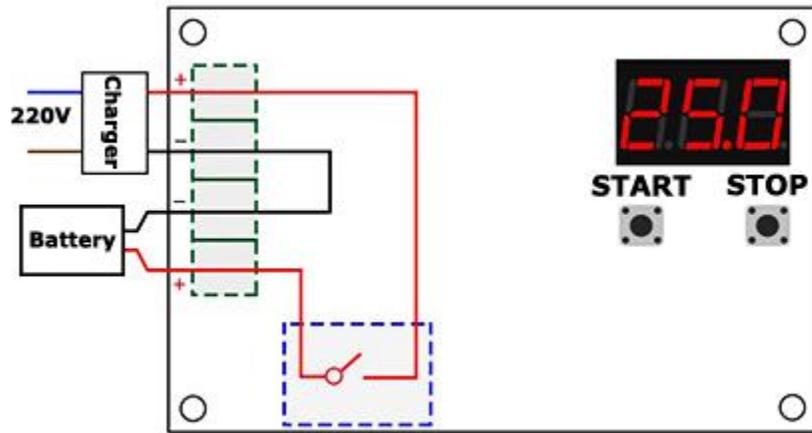

## Application Scope:

12-24V storage battery (Applicable to solar cells, new energy batteries, Lead-acid batteries, nickel-cadmium batteries, nickel-metal hydride batteries, lithium-ion batteries, polymer batteries, Car battery, electric car battery)
