

# Digital Current Meter

## Model: AD16-22DSA

### **Features:**

- Accurate Measurement: The ammeter can accurately measure the current, and the anti-skid wiring is very simple. The current range is 0~100A, and the frequency range is 20~75Hz.
- Flame Retardant: The ammeter is flame retardant as a whole to ensure reliable and safe measurement.
- Bright Digital Panel: Bright digital panel, the current reading is clear at a glance, and the working status is clear at a glance.
- Low Power Consumption: The digital ammeter has low power consumption, is green, and has a longer service life. Be careful not to exceed the voltage and current range when using it. Voltage 220V AC.
- High Quality Material: Made of high-quality materials, dust is not easy to enter the indicator light.

### **Specifications:**

- Item Type: Digital Current Meter
- Voltage: 220V AC
- Current Range: 0~100A
- Frequency Range: 20~75Hz
- Color: Yellow
- Mounting Hole: 22mm
- Dimensions (LxW): 50 x 29mm

*Made in China*
