

Treadmill Motor 3.0HP

Overview:

This Treadmill PM DC Motor is especially designed for high power treadmills. The Treadmill PM DC Motor can also apply to other machinery when modified properly in features and structure.

They are of low noise, small size, and light weight.

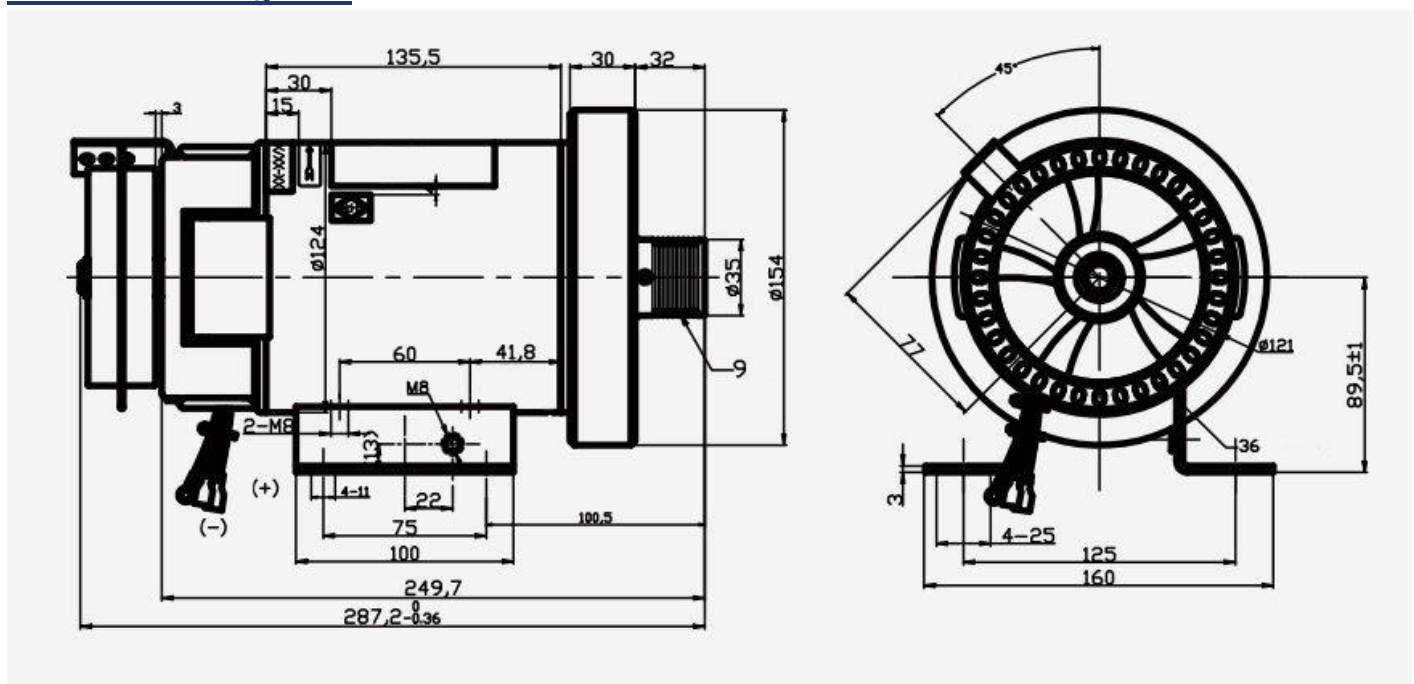

Large output, high efficiency.

Hard mechanical feature and stable electromagnetic performance.

Specifications:

- Power (HP/W): 3.0/2200
- Voltage: 180V
- Current: 12.5A
- No load speed (r/min): $3300 \pm 7\%$
- Full load speed (r/min): $2600 \pm 7\%$
- Torque: 8.26N.M
- Ins. Class: F
