

Aquarium Light Phone App Smart Controller

Model: Chihiros COMMANDER 1

Description:

The Chihiros Dimming Bluetooth Controller allows wireless control of Chihiros lamps via the Chihiros app making it possible to program a course of the day with a Chihiros lamp. Scenarios such as dawn, lunch break or sunsets as well as basic, stepless dimming can be realised in just a few steps using simple presets with a diagram illustrating the light curve.

The Chihiros Bluetooth Commander 1 allows wireless control of the Chihiros A Series, RGB Series, A Plus Series, C Series and others, which are listed in the table below. Here all existing LEDs are controlled together, emulating the course of the day. Control of individual colors is not possible with the RGB series.

Features:

- Wireless control and programming via Chihiros App and Bluetooth connection
- Compatible with Android and iOS
- Smartphone with Bluetooth connectivity required
- Compatible lamps: C Series, A Series, A-Plus Series, E Series, X100, X200, S Series, RGB Series, Wabikusa LED-Light
- Voltage: DC 12-36V, Max output 7.5V
- Dimensions: 6cm x 6cm x 1.4cm
