

RGBW Aquarium Light Phone App Smart Controller

Model: Chihiros COMMANDER 4

Description:

The Chihiros Dimming Bluetooth Controller allows wireless control of Chihiros lamps via the Chihiros app making it possible to program a course of the day with a Chihiros lamp. Scenarios such as dawn, lunch break or sunsets as well as basic, stepless dimming can be realised in just a few steps using simple presets with a diagram illustrating the light curve.

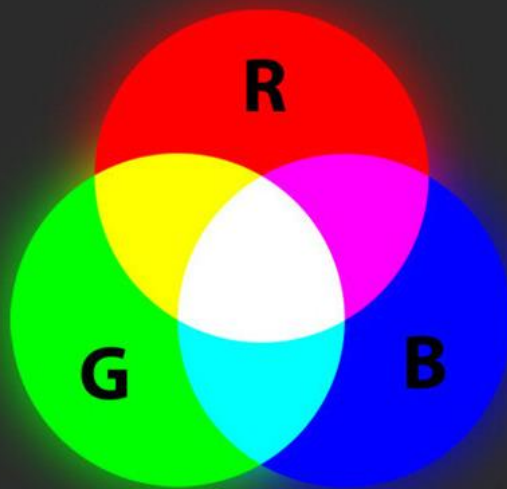

The Chihiros Bluetooth Commander 4 is suitable for the WRGB as well as the Vivid and A Plus RGB. It can control the red, green, blue and white channels of the WRGB lamps separately via the Chihiros app. So you can adjust the brightness as well as the color temperature.

The connection to the Commanders is realized via Bluetooth.

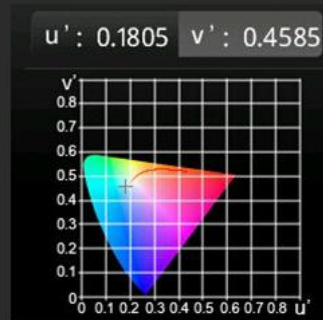

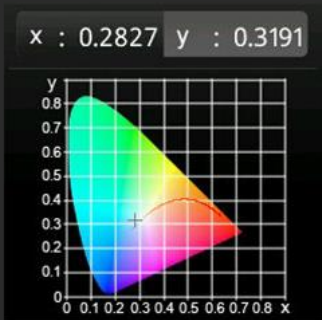

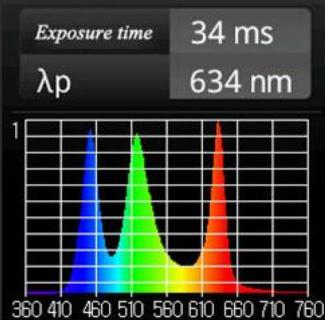

Features:

- Wireless control and programming via Chihiros App and Bluetooth connection
- Compatible with Android and iOS
- With stepless brightness control and power-off memory function.
- With timing Sunrise and Sunset functions.
- Compatible lamps: WRGB, A Plus RGB, Vivid.
- Voltage: DC 12-36V, Max output 7.5V
- Dimensions: 6cm x 6cm x 1.4cm

More Detailed Photos:

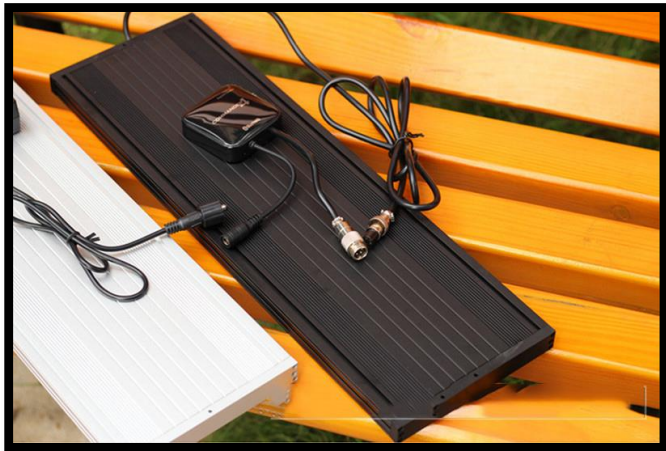

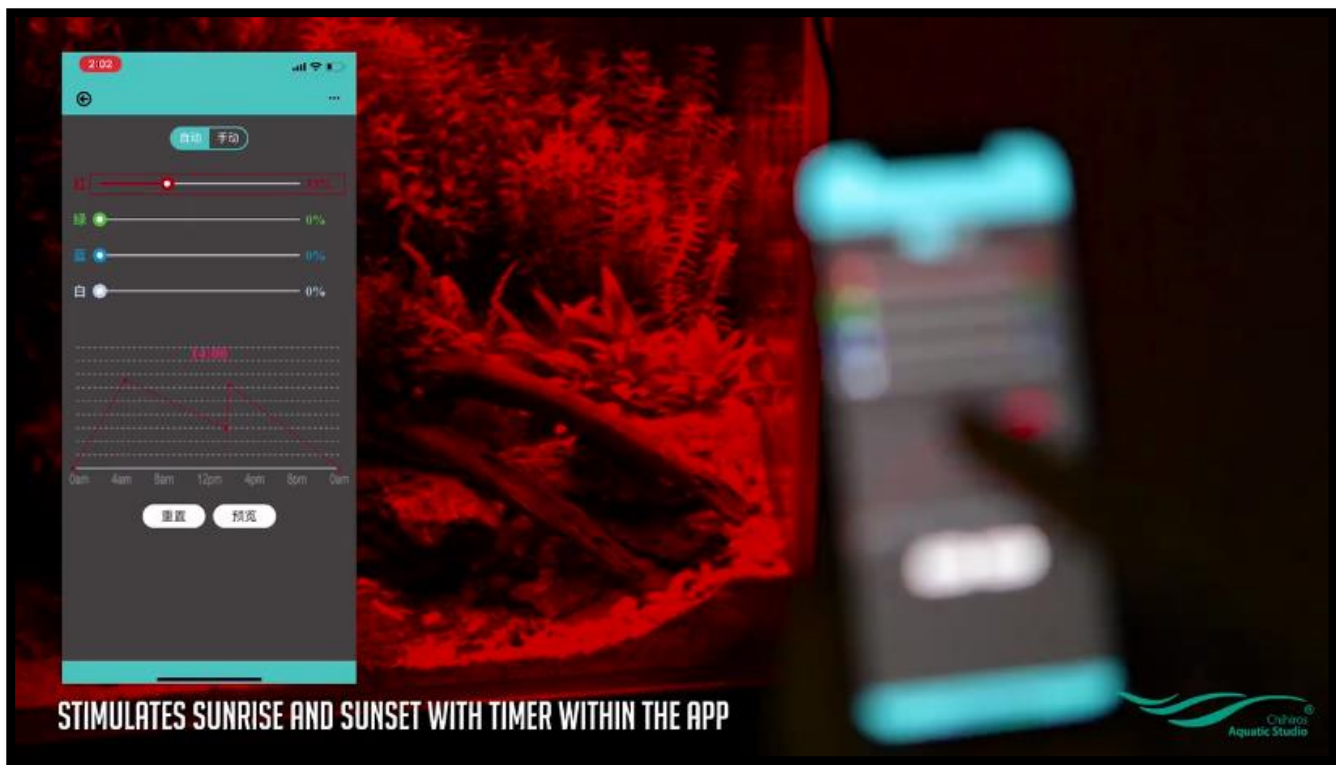

Using three primary colors scientifically mix light into white light, to provide a more direct and effective spectrum for aquatic plants, and make the color and light more realistic, water plants and fish have a better viewing effect.
