

DC Brushless Water Pump 12V 10W

Description:

- Made from engineering plastics, energy saving, environmental protection, durable and waterproof grade up to IP68.
- Stable and reliable running, low power consumption, high efficiency, and has screen effect.
- This DC pump uses advanced electronic components and high-quality wear-resistant shaft.
- It is smooth operation, high efficiency, good performance, long service life.
- Can be a long time continuous work, low noise, safety and environmental protection.
- Can be used for computer water cooling systems, fountains, handicrafts, coffee machine, soilless culture, shower, water heater pressure, plumbing mattress, hot water circulation, swimming pool water filtration, sanitary products etc..

Specifications:

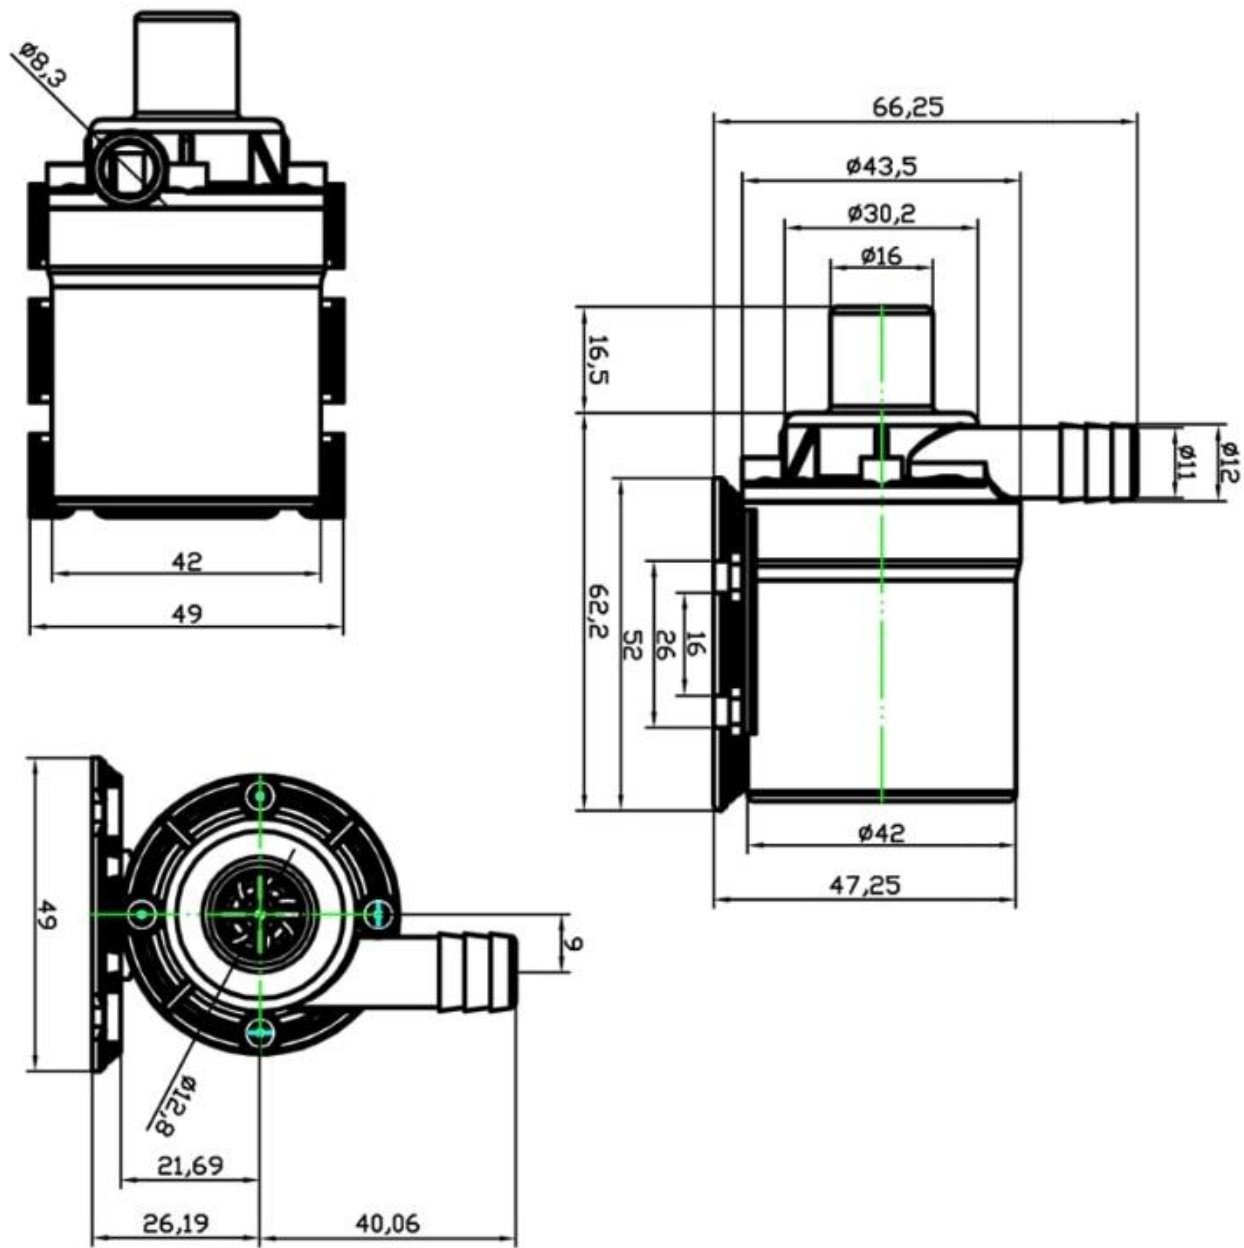

- Inlet/Outlet: 1/2" male thread
- Voltage: 12V DC
- Maximum Rated Current: 1000MA
- Power: 10W
- Max Flow Rate: 800 L/H
- Max Water Head: 5m
- Max Circulating Water Temperature: 100°C
- Material: Plastic
- Color: Black
- Size: About 66.25x47.25x78.7mm

Note:

1. Do not take the wrong pump positive and negative.
2. Prohibit not through the power converter will be connected directly to the 220V power supply pump.
3. Is strictly prohibited for strong acidity, alkali and other damage to the pump medium.
4. The pump is suitable for medium temperature 1°C -60°C.
