

SONY

Sony Passive 3D Glasses

Model: TDG-500P

Description:

The Sony passive 3D glasses (TDG-500P) are just like the ones you get at the movie theater, so they are very lightweight and comfortable to wear. The 3D image formatting is done solely on your compatible Sony 3D LED-LCD TV, so the 3D glasses are passive (no batteries required) and don't need to be synced, enabling you to enjoy 3D images anywhere in your room and free from the interference of other objects. The passive 3D glasses design also lets you enjoy 3D images from any viewing angle; whether you are sitting on the couch or laying on floor.

Features:

- **3D that jumps at you**
You'll see clear, detailed images with lifelike depth, it's like the 3D you see in the cinema
- **Wear them with your specs**
You can put these Passive 3D glasses on over your day-to-day glasses, they'll still work
- **You'll forget you're wearing them**
These lightweight frame glasses won't irritate you during long movie sessions
- **Cool, slim look**
A sleek, black frame gives the look of stylish sunglasses
- **Easy storage**
Keep them safe when they're not in use with a convenient folding design
