

USB SDR+R820T2 DVB-T TV Tuner for Android Phones Model: ZMT-8985

Features:

- This product is a RTL-SDR software defined radio receiver for android phone.
- Support DVB-T signal.
- Full compatibility with a wide variety of SDR software, such as Matlab, HDSDR, SDR Touch, Planeplotter, etc.
- An approximate tuning range of 25MHz-1750MH improves selectivity and sensitivity in most frequency ranges.
- Wireless engineers, students, and hobbyists can learn to receive and decode real-world radio signals using this low cost RTL-SDR hardware connected to your computer.

Specifications:

- RTL-SDR Project
- RTL-SDR Subreddit
- SDR Driver & Software Auto-Installer
- Applications: SDR, DVB-T Tuning
- Interface IC: Realtek RTL2832U
- Tuner IC: Rafael Micro R820T2
- Antenna Input: Female MCX
- Dimensions (USB device only): 24mm x 21mm x 8mm
- Color: Blue
