Usage Instructions:

1. Getting started

Read the instructions carefully. Plug the heater into a wall power socket, (220V-240V). Press the power switch on the side of the device.

2. Select the desired temperature

When the display screen shows the set temperature, press the "+" button on the heater or on the remote control unit to increase the temperature and the "-" button on the heater or on the remote control unit to reduce it (between 15 degrees C and 32 degrees C).

3. Set the fan speed

Press the "MENU" button until the display screen shows "HH" or "LL" then press the "+" button to set the "HH" (High speed) or the "-" button to set "LL" (Low speed).

4. Set the timing

Press the "MENU" button until the display screen shows one number between 1 and 12, then press the "+" button to increase timing time or the "-" to reduce it. You can also repeatedly press the "Timer" button on the remote control unit to set the timing time.

NOTE:

For safety reasons, the heater's maximum default timer setting is 12 hours.

More Product Details:

The advertisement features a large image of a black, circular electric heater with a red digital display showing '25'. The heater is plugged into a wall outlet. To the right, a woman with glasses is smiling while talking on a mobile phone. Below the main image, there are two smaller images of the heater in white and black. At the bottom, there are four icons: an eye, a remote control, a speaker with a slash through it, and a thermometer. Below these icons, the text reads: 'Digital Display Telecontrol Super Quiet Fast Heating'.
