

# Hydroponic Plant Growth Machine with LED Growth Lights

## Description:

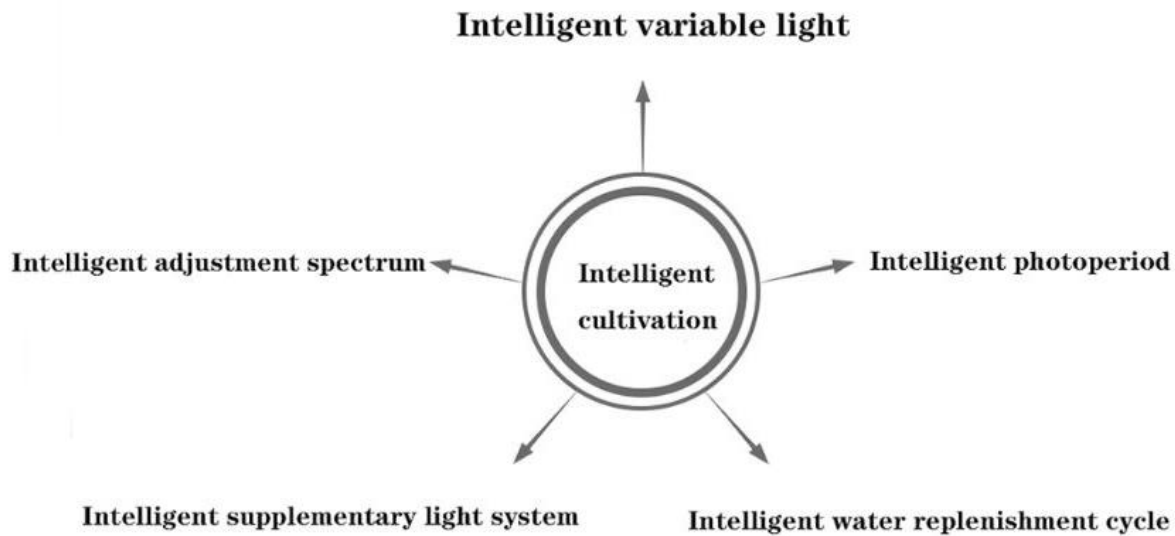

New Hydroponics technology, special planting medium can avoid insect pest pollution caused by soil and prevent mosquito growth. At the same time, the imported compressed soil is used to improve the germination rates of plants, which is more suitable for plant growth.

Special intelligent lighting and water tank settings; through the study of the sunlight spectrum, special LED light beads are used to supplement the light of plants, so that they can photosynthesize, have enough sunlight and water supply, and avoid the baptism of outdoor wind and rain, so that the flowers are more colorful and attractive, and the flowering period is longer.

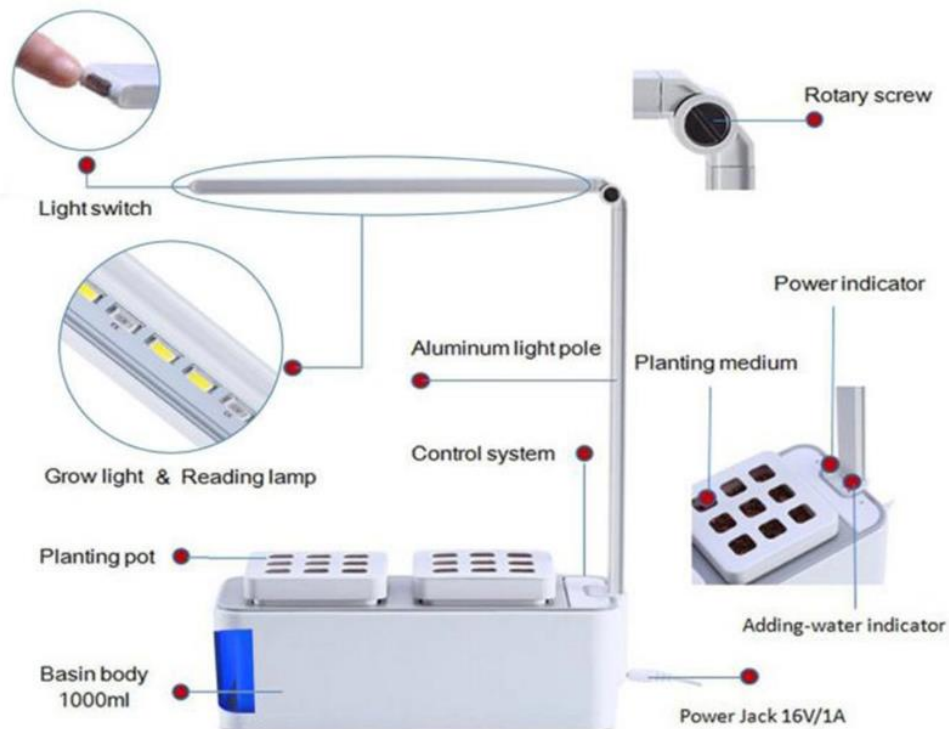

## Specifications:

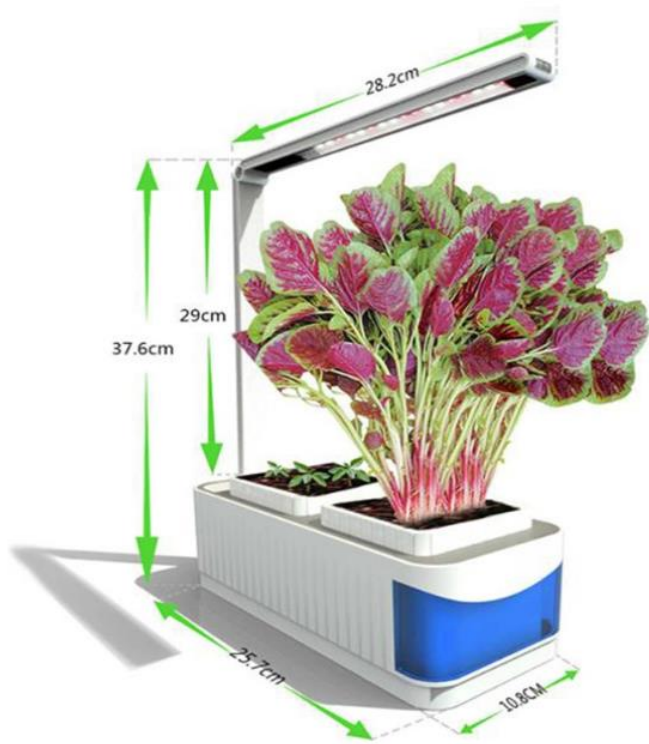

- Power adapter: input AC 100-240v, output DC 16V 1A
- LED bead power: 8.5W (White light: 0.5w \*10, Red light: 0.5w \*5, Blue light: 0.5w \*2)
- Luminous lux: 5500Lm
- Safety grade: IP42
- Control mode: automatic/manual
- Shell material: ABS
- Working life:  $\geq 35,000$  hours after assembly
- Capacity: 1.5L (1500ML)
- Host size: 257mmx111mmx108mm
- Height: 376mm water storage
- Overall weight: 760g
- Water level window color: blue
- Planting types: flowers, herbs, vegetables, fruits.

## More Product Details:

**When the plant runs out of water,  
the red light goes on and water is added automatically.  
You don't have to worry about water shortage.  
Low water light alarm and low water sound warning,  
You can also observe the water level through a transparent  
window.**

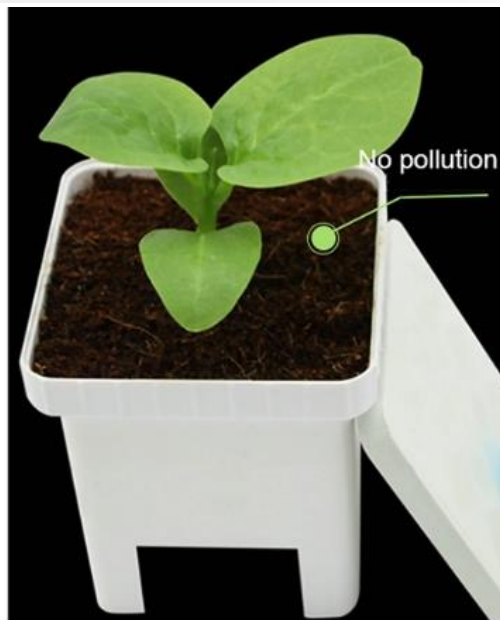

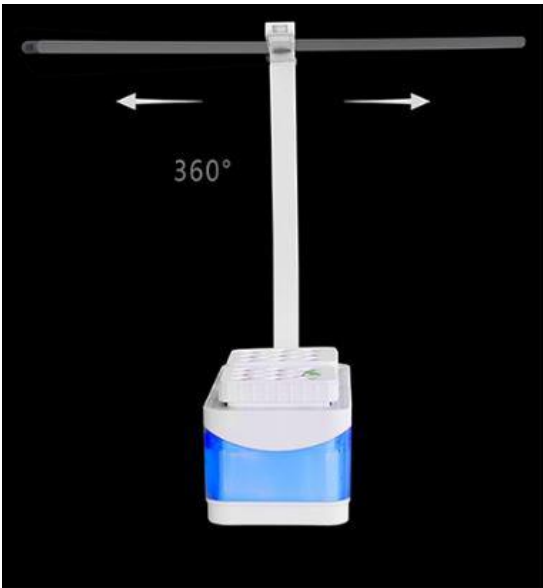

### **Soilless culture**

- 1. It's very entertaining**
- 2. You don't have to worry about watering plants to death**
- 3. Quick fertilization, as long as the nutrient solution can, will not cause harm because of fertilizer**
- No pests, no dirt, no bacteria**
- 4. For every occasion (bedroom, meeting room, office, living room)**

### **Natural, harmless material**

The raw material made from coconut shell has no pollution and no harm.  
 Replace the soil, more conducive to the absorption of nutrients plants

**Add water, nutrient solution**

**It can be  
used as a  
lamp**

# Suitable for planting

*Made in China*
