

# ***Biostar PCI-e to 4x USB 3.0 Crypto Mining Card***

***Model: DCBTC2***

## **Description:**

The Biostar DCBTC2 is a hub adapter for mining cryptocurrency that helps increase the volume of Bitcoins or other cryptocurrencies (Ethereum, Zcash..). You can connect it to a motherboard via the PCIe x1 slot. This frees up USB slots to connect up to 4 riser cards that are designed to mine virtual currencies.

## **Features:**

- After connecting to the PCIe x1 slot, you have 4 free USB slots to connect riser cards
- Compatible with a range of Biostar motherboards
- Powered by a 4-pin Molex Connector
- Intended to increase volume when mining cryptocurrencies

## **Specifications:**

- Controller: ASM1184e (1 to 4 PCI-E Pocket Switch)
- Interface: PCI-Express 2.0 x1
- Connector: USB3.0 Connector x4 (PCI-E Signal)  
Auxiliary Power Connector x1 (12V)
- Operating System: Windows 7 (64bit) / 10 (64bit)

## **Examples of Compatible Motherboards:**

RACING H170GT3

GAMING H170T

Hi-Fi H170S3H

Hi-Fi B150S1

Hi-Fi B150S1 D4

TB150 PRO
