

Fan Simulator for Bitmain Antminer Miners L3 D3 S7 S9 Z9 S17 T15 T9 V9

Description:

FAN SIMULATORS for the Bitmain Antminer Miners or any other Crypto-Miners with Pulse Wave Modulation (PWM) cooling fans (4-pin).

Features:

- It works for all Antminers with PWM 4-pin Fans.
- Its chip artificially generates a 2200~6500 Fan RPM signal back to the miner's control board.
- It can work under 5~36V.
- It is suggested to unplug the front fan and remove it from the miner so that it will not block the air flow into the miner.
- Plug the fan simulator into the front fan socket.
- The screen shot is the real-world testing result.

Specifications:

- Color: red
- Material: PCB + Electronic accessories + Plastic
