

Wifi Solar Panel Sonoff

Description:

Used with SONOFF Zigbee Smart Curtain Motor to convert solar energy into electricity, which is energy-saving and environmentally friendly. One day's charge can support the curtain motor to work for three days.

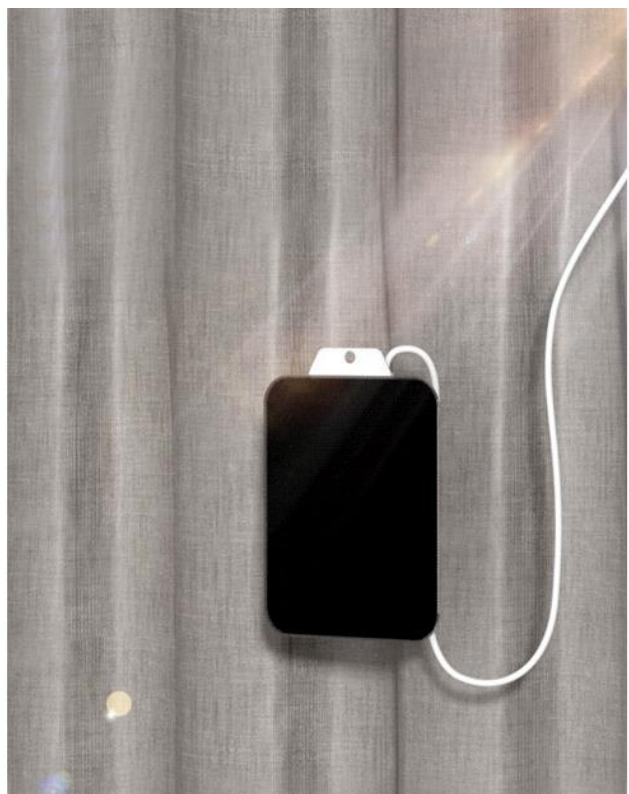

Specifications:

- Output: 6V_400mA
- Max. Power: 2.4A
- Output Interface Type: Type-C
- Transformation Efficiency: 20%
- Working Temperature: -10°C - 60°C
- Solar Panel Type: Monocrystalline Silicone
- Shell Material: PC
- Color: White
- Product Size: 162.5 x 114 x 11 mm

 **One** day \approx  work for **three** days.

*Solar panels need to be purchased extra
*The data comes from the laboratory. When the maximum light intensity of the day is 6037LX, the charging capacity of one day can support the device to work for three days.
