Source Screen Hanging Lamp

Model:TB-30SA

Description:

- Anti-Glare Screen: The computer monitor light bar has a unique asymmetrical optical design that illuminates only your desk and keyboard while ensuring no reflective glare on the screen. Our desk lamps block blue light and light radiation to protect your eyes.
- Three colors of light: the three colors of white, warm white and warm light can be switched with one key. Press and hold the button to control the brightness of the light. The monitor's light bar can be continuously adjusted to meet the different needs of different scenes.
- Timing function: 60 minutes timing stop function, which can control eye time well. One click to activate fast reading mode, and a full-spectrum LED light source creates a more comfortable light environment.
- High color rendering: gaoRa90's high color rendering index allows you to see the real color and avoid the bad impression caused by color difference. The computer screen lamp allows you to face the computer screen for a long time without getting tired.
- Convenient to use: Our screen light allows you to manually adjust the brightness and color temperature by long pressing the stepless dimming key. 3000K-6500K stepless color temperature adjustment, switch between cold and warm light at will.
- The perfect angle to have no glare on your screen while still providing enough light for your desk and keyboard.
  Our home desk lamps block blue light and light radiation, effectively relieving eye strain and protecting your eyes. It is ideal for students, graphic designers and business office workers.
