

123 Industrial ScopeMeter®

Three-in-one simplicity

The compact ScopeMeter 123 is the rugged solution for industrial troubleshooting and installation applications. It's a truly integrated test tool, with oscilloscope, multimeter and "paperless" recorder in one affordable, easy-to-use instrument. Find fast answers to problems in machinery, instrumentation, control and power systems.

- A dual-input 20 MHz digital oscilloscope
- Two 5000 counts true-rms digital multimeters
- A dual-input TrendPlot™ recorder
- Connect-and-View™ trigger simplicity for hands-off operation
- Shielded test leads for oscilloscope, resistance and continuity measurements
- Up to five hours battery operation
- Optically isolated RS-232 interface
- Rugged compact case

Safety Conformance

All inputs are protected to EN61010-1, CAT III 600V. UL and CSA listed.

True-rms

Accessories and Ordering Information

Included Accessories

Comes complete with PM 8907 line adapter/charger, STL120 shielded test leads set, AC120 Alligator Clips, HC120 Hook Clips, BB120 shielded BNC adapter, user's manual and BP120 rechargeable battery pack.

Optional Accessories

Accessory cases, batteries, test leads and probes, interface cables and FlukeView software available.

Connect-and-View™
triggering for an instant,
stable display

**Connect
and
View**

Scope users know how difficult triggering can be. Wrong settings show unstable and sometimes wrong results. Fluke's unique Connect-and-View recognizes signal patterns, and automatically sets up correct triggering. It provides a stable, reliable and

Connect-and-View captures even the most complex motor drive signals

repeatable display of virtually any signal - including motordrive and control signals - without touching a button. Signal changes are instantly recognized and settings adjusted for - once again - a stable display. Benefit from the speed and convenience when measuring a number of testpoints in quick succession, unlike ordinary AutoSet/ AutoRanging scopes.

Quickly check the control signal from the digital board without even touching a button. Triggering, amplitude and timing are automatically set to provide a stable display of even a complex digital control signal.

ScopeMeter® 190 Series

Speed, performance and analysis power

True-rms

For the more demanding applications, the ScopeMeter 190 Series high-performance oscilloscopes offer specifications usually found on top-end bench instruments. With up to 200 MHz bandwidth, 2.5 GS/s real-time sampling and a deep memory of 27 500 points per input they're ideal for engineers who need the full capabilities of a high-performance oscilloscope in a handheld, battery powered instrument.

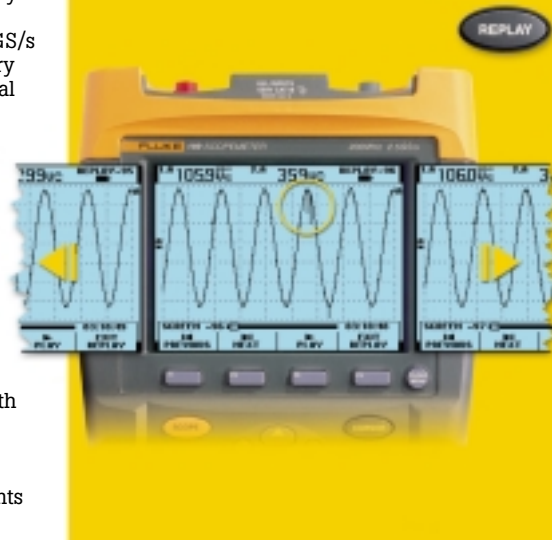

- Dual-input - 60, 100 or 200 MHz bandwidth
- Up to 2.5 GS/s real-time sampling per input
- Connect-and-View™ automatic triggering, a full range of manual trigger modes plus external triggering
- 27 500 points per input record length using ScopeRecord mode
- Automatic capture and replay of 100 screens
- 24 automatic waveform measurements
- Cursors, zoom and real-time clock
- Four hours rechargeable NiMH battery pack
- Up to 1000V independently floating isolated inputs
- Includes a 5000-count true-rms multimeter and a TrendPlot™ paperless recorder

Safety Conformance

All inputs are protected to EN61010-1, CAT III 600V and CAT II 1000V. UL and CSA listed.

Automatic capture and replay of 100 screens

Scope users know how frustrating it is to see an one time anomaly flash by never to be seen again. Not with the ScopeMeter 190 Series! Now you can look back in time with a touch of the replay button. In normal use, the instrument continuously memorizes the last 100 screens. Each time a new screen is acquired, the oldest is discarded. At any moment you can "freeze" the last 100 screens and scroll through picture-by-picture or replay as a 'live' animation. Cursors can be used for further analysis. You can even use the advanced trigger capabilities to capture up to 100 specific events. Two sets of 100 captured screens with individual time stamps can be stored for later recall or download to a PC.

Accessories and Ordering Information

Included Accessories

199, 196 + 192:

BC190 Battery Charger/Line Voltage adapter,
Voltage Probe sets, Hook Clips for Probe Tip, Ground Leads with Hook Clip, Ground Leads with Mini Alligator Clip, Test Leads, User's Manual and BP190 Rechargeable Battery Pack (installed)

199 + 196:

Industrial Alligators for Probe Tip, 2-mm Test Probes for Probe Tip, 2-mm Test Probes for Banana Jack, Industrial Alligators for Banana Jack, Ground Leads with 4-mm Banana Jack

Optional Accessories

Accessory cases, batteries, probes, probe accessory sets, probe replacement sets, test leads, interface cables and FlukeView software available.

ScopeMeter 190 Series for Medical

The MS190 software and MA190 accessory set extends the capabilities of the 190 Series for use on medical imaging equipment and video display systems.

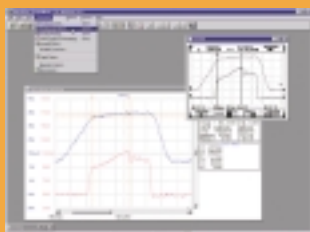

The MA190 adds mAs measurements, smart averaging, extended offset, selectable persistence and extended video triggering.

The MA190 contains a 1Ω current shunt, a 50Ω BNC feedthrough terminator, a 50Ω BNC terminator with 10:1 signal attenuation and a 1.5m BNC cable.

ScopeMeter® Test Tools

Oscilloscopes for field applications

FlukeView® Software for documenting, archiving and analysis

FlukeView® for Windows® helps you get more out of your ScopeMeter by:

- Documenting - transfer waveforms, screens and measurement data from the ScopeMeter to a PC. Print or import the data into your report.
- Archiving - create a library of waveforms with your comments for easy reference and comparison.
- Analysis - use cursors, perform spectrum analysis or export data to other analysis programs.

ScopeMeters are connected to a PC via an optically-isolated RS-232 interface cable. Software and cable come as separate items or as part of a special value kit. This kit also includes a protective hard shell carrying case for safe and convenient storage of instrument and accessories.
