

CISCO CONSOLE CABLE D9 FEMALE TO RJ-45

How to creat Cisco console cable by yourself?

1. Preparation:

You should prepare the following two, as well as a Cisco and a console-terminal.

- RJ45-DSub9Pin Cable Changer (In=RJ45 Female, Out=DSub9Pin Female)

- Ethernet Category-5 straight cable

Other category would be okay.

2. How to connect them:

Please see the following picture. At least you must connect DSub9Pin's 2, 3, and 5 to the correct corresponding port on RJ45; others are optional.
