

# 220K 2W Single Coil Carbon Film Potentiometer

Model: WTH118

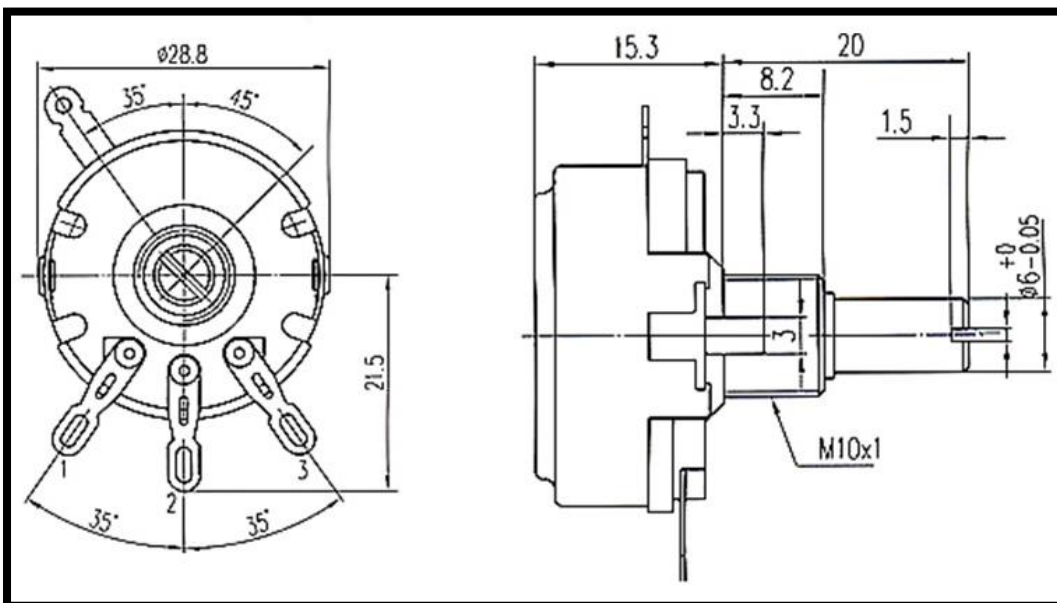

## Specifications:

- ❖ Rotation Angle: 270°
- ❖ Resistance Tolerance:  $\pm 20\%$
- ❖ Rated Current: 1A
- ❖ Resistance Value : 220K ohm
- ❖ Rated Power: 2W

## Applications:

- Used as divider: potentiometer is a continuously adjustable resistor. Adjusting the handle or slider  $\Rightarrow$  output voltage.
- Used as rheostat: connected into two end devices  $\Rightarrow$  obtained within the travel range of the potentiometer.
- Used as current controller: one of the selected current outputs must be a sliding contact lead.

## Dimensions:

Made in China
