

ZnSe Focus Lens for CO2 Laser Engraver 20mm

Features:

- Focus lens is the fitting of CO2 laser machine, which is used to focus the beam after reflection, to realize engraving or cutting.
- Meniscus type lens, better focus and meticulous path of light.
- Can withstand high power density, firm film, less spot, resistant to wipe and scratch.
- Used for laser processing, fits for engraving machine, marking machine, cutting machine, etc.

Specifications:

- Material: ZnSe
- Diameter: 20mm/0.71"
- Thickness: 2mm/0.08"
- Focal length: 38.1mm/50.8mm/63.5mm/76.2mm/101.6mm (1.5", 2", 2.5", 3", 4")
- Wavelength: 10.6um
- Diameter tolerance: +0/-0.13mm
- Centre Thickness Tolerance: $\pm 0.25\text{mm}$
- Focal Length Tolerance: $< \pm 2\%$
- Clear Aperture: $\geq 90\%$ Diameter
- Scratch/Dig: 40-20
- Surface Accuracy: $\lambda/2$ per 1"Dia

Made in China
