

SMT Manual PCB Silk Screen Printing Machine

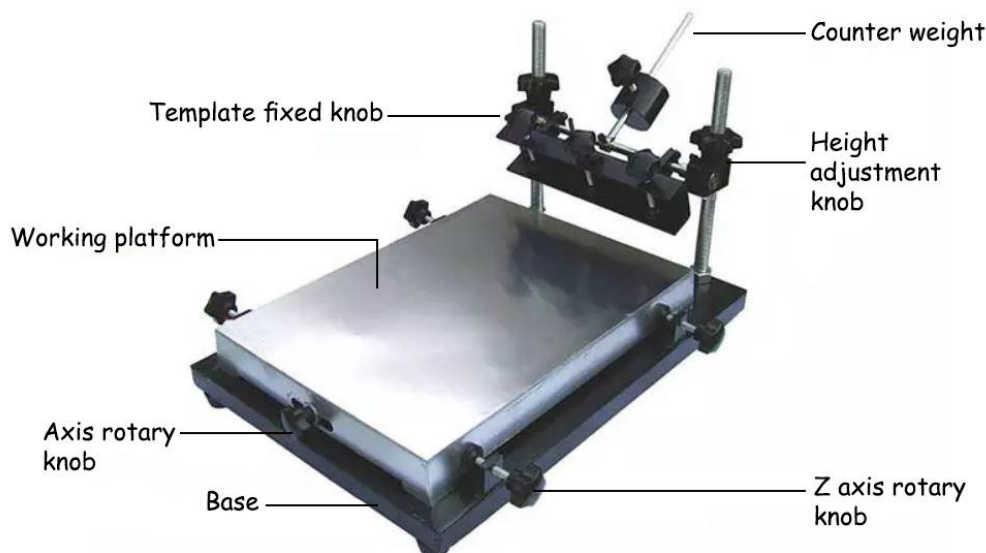

Description:

Simple manual stencil printer machine is small and convenient, especially for new product trial, and some low-volume electronics factories, the production of many varieties, affordable and easy to use.

Features:

- **Wide Application Field** - This SMT Printer can print flat products such as: electronic circuit boards, paper, paper boxes, glass, wood boards, PVC boards, cloth sheets, ABSPP plastics and other flat products.
- **Smooth and Flat Countertop** - Surface aluminum plate is corrosion resistant, sprayed with environmentally friendly water paint, easy to clean.
- **Screen Fixed Chuck** - Enhanced version of the screen fixed chuck can clip screen frame with up to 3.7cm thickness.
- **Precision wear-free bearings** - free to adjust the upper and lower positions of the screen clamp.
- **Counterweight** - Screen printing table balance hammer, safe material to ensure the balance of machine operation.

Structure:

Specifications:

- Positioning method: Three-sides positioning
- Adjustment method: Manual adjustment
- Adjustment direction: X Y Z axial direction
- Printing table acreage: 320x440mm
- Outline size: 620x470x380mm
- Net weight: 11Kg

Application:

Made in China
