

# ***CABLE SIGNAL LINE 3 CORE MONSTER M1000I***

## **Description:**

M1000I is the ultimate refinement of our most popular audiophile interconnect design. Based on our patented Bandwidth Balanced® technology M1000I features a three-network design that "phase compensates" the signal over the entire audio spectrum.

- UL CL3-Rated for in-wall use.
- 12-Cut 24k gold contact Turbine® RCA connectors provide advanced signal transfer.
- PEX™ dielectric reduces capacitive effect of insulation for better transmission of high frequency information.
- Three MicroFiber® wound networks provide isolation for natural harmonics through entire bandwidth.
- Three Time Correct® multiple-gauge wire networks phase compensate signal for accurate reproduction.

## **Features:**

### **A New Standard for Sonic Excellence:**

Some audiophile cables are manufactured with high performance and price in mind. While they may perform better than conventional cables, they probably don't capture all of the finer nuances of recordings. Enter M1000i – designed for audiophiles unwilling to compromise performance for price. Our M Series® reference cable is the result of many years of experience in cable design and critical listening. The results speak for themselves.

## **The Ultimate Tonal Balance and Audio Accuracy: Three-Way**

### **Bandwidth Balanced® Construction:**

M1000i features three precision-wound Bandwidth Balanced networks to separately guide the bass, mid and high frequencies down the wire. These multiple-gauge wire networks are specially wound to optimize varying magnetic fields as they travel through the cable for maximum sonic depth, accuracy and power.

### **Technologies Created By and For Perfectionists: MultiTwist®,**

### **MicroFiber®, and PEX™ Dielectric:**

MultiTwist® is an advanced cable construction that brings out musical nuances by minimizing noise and improving dynamic range. M1000i combines it with our special MicroFiber dielectric insulation, for maximum rejection of interference, and innovative PEX dielectric for improved signal transfer. The result: A cable as advanced sonically as it is technologically.

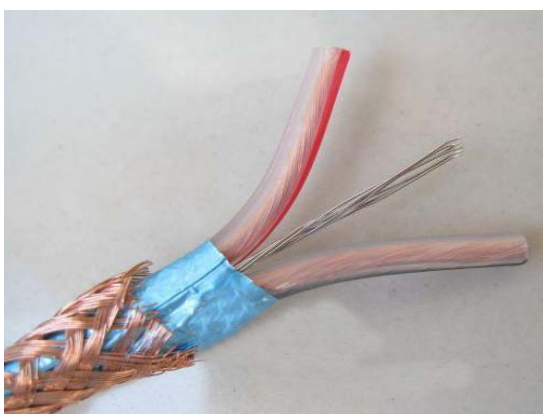

### **No-Compromise Connector: Heavy-duty, Patented 12-Cut**

### **Turbine® RCA:**

Our patented 12-cut Turbine connector offers a unique heavy mass ground shell for maximum signal transfer and a tight fit. Multiple cuts allow for 12 contact points – the highest of any connector – while 24k gold plating ensures high conductivity and superior corrosion-resistance.

### **Great Music, Pure and Simple:**

M1000i brings you closer to the original performance than you ever dreamed possible. It offers the ultimate sonic performance in a cable – for audiophiles who can afford the best.
