

# *Wireless Little Turtle Robot*

## **Learning Kit Features:**

1. Course straightaway
2. Deep stepped learning
3. Storage type package, effectively prevent accessories lost
4. Program code provided
5. lithium-powered, more economical and more environmentally friendly
6. Scalability, can add other functional modules
7. All-metal motor, high precision
8. Add intelligent control QQ group, to share the joy with fans

## **Experimental courses:**

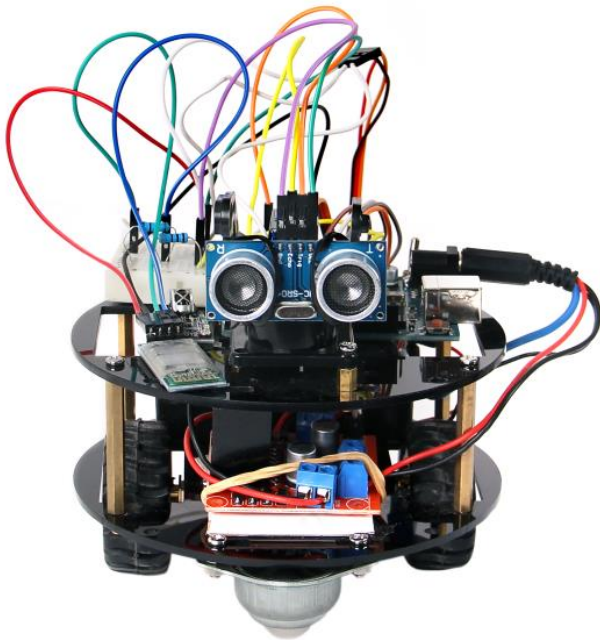

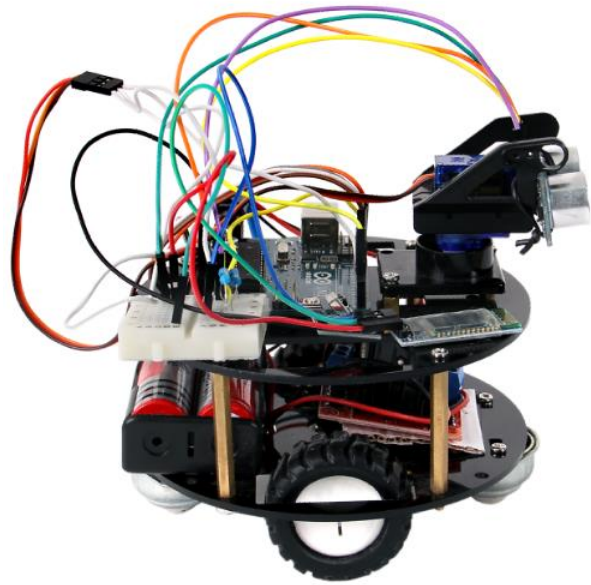

1. LED flashes experimental
2. PWM control light intensity experiments
3. Advertising light water experiment
4. Experimental control button LED
5. Traffic lights design experiments
6. Responder experiment
7. Buzzer experiments
8. Simulated values read experimental
9. Sound and light control experiment
10. Photosensitive light experiment
11. Experimental LM35 temperature sensor
12. Tilt switch experimental
13. Flame alarm experimental
14. Digital tube experiments
15. Four digital tube display experiment
16. 74HC595 application of experimental
17. Infrared remote experiments
18. L298N motor driver board applications
19. Hunt experiments smart car
20. Smart anti-drop test
21. Smart car obstacle avoidance experiment (sending infrared obstacle avoidance information)
22. Infrared remote control smart car experiment
23. Three and a (hunt obstacle avoidance remote) Multifunction experiment

Electronics Katrangi Trading

## Robot Parts:

1. Metal Gear Motor 2
2. premium tire 2
3. Motor mount 2
4. Bovine Caster
5. Robot chassis 2
6. L298N motor driver board a
7. ARDUINO UNO328 panel 1
8. ARDUINO sensor expansion board a pan 1
10. Servos
11. Ultrasonic Module 1
12. Three groups hunt module
13. receives infrared sensor
14. Microcontroller remote control
15. 2000MA 18650 rechargeable battery 2
16. 18650 batteries Box a
17. 18650 chargers
18. DuPont line 40
19. Pillars 35MM long 4 10MM 2
20. 3MM several screw nut

*Made in China*
