

RaspberryPi

Control & Display

Features:

Pi-face™ Control & Display is a plug and play device that allows you to use and control your Raspberry Pi without

a keyboard, mouse and monitor. It saves space and power by removing the need for a monitor whilst still providing

a simple, yet capable interactive user interface. Pi-face™ Control & Display is ideal for applications such as internet radio, streaming media, XBMC and many more

PiFace CAD allows you to unshackle your RaspberryPi from the constraints of the monitor and facilitates interaction

.with its on board buttons and IR remote transceiver

Specifications:

- character by 2 line alphanumeric display 16
 - User definable custom characters
 - LED display backlight
 - IR receiver for infrared remote control
 - position navigation switch-3
 - tactile switches 5
- Quick and easy menu building Python libraries -provided

Made in UK
