

Wirewound Potentiometer 10k

Specifications:

- Working Voltage: 200V
- Power: 2W
- Spot Resistance: 10K
- Resistance Tolerance: $\pm 5\%$
- Rotation angle: $285^\circ \pm 5^\circ$
- Shaft Torque: 3.5~100mN.m
- Effective electrical angle: $270^\circ \pm 5^\circ$
- Operating Temperature Range: -55°C to $+125^\circ\text{C}$
- Shaft Diameter: 6mm
- Shaft Length: 49mm
- Outside diameter: 23mm

Made in China
